LinkedIn ↗ | GitHub ↗ | Portfolio Site ↗ | Medium ↗

Summary

DevOps Engineer with 3+ years of experience in AWS, Kubernetes, CI/CD automation, and GitOps. **Certified Kubernetes Administrator (CKA)** with hands-on expertise in managing multi-environment EKS deployments using Jenkins, Docker, ECR, Helm, and Argo CD. Skilled in Terraform, Ansible, Kubernetes troubleshooting, and deployment automation to ensure reliable and highly available systems.

.

Technical Skills

Cloud: AWS (EKS, EC2, ECS, ECR, VPC, S3, IAM, ALB, Lambda, Fargate)
Containers & Orchestration: Docker, Kubernetes
CI/CD & GitOps: Jenkins, GitHub Actions, Argo CD, GitOps
Configuration Management: Ansible, Terraform, Shell scripting
Monitoring & Observability: Prometheus, Grafana
Scripting & Programming: Bash, Python
Tools & Systems: Git, Linux Administration, NGINX, MySQL

Certifications

Certified Kubernetes Administrator (CKA) [certificate ↗] – The Linux Foundation / CNCF (2026) | **87% Score**

Experience

DevOps Engineer Sep 2023 – Present
JPL (Jio Platforms limited)

- Manage **AWS EKS-based Kubernetes workloads** across SIT, pre-production, and production environments, supporting application availability, release stability, and environment consistency.
- Maintain and optimize **Jenkins CI/CD pipelines** for daily builds for SIT, integrating developer changes, building Docker images, and publishing versioned images to **Amazon ECR,** enabling continuous integration testing and faster developer feedback.
- Manage **Argo CD-based GitOps releases** for pre-production and production environments, updating container image versions, synchronizing Git-managed manifests, and resolving synchronization failures.
- Troubleshoot Kubernetes workloads, including **CrashLoopBackOff, ImagePullBackOff, pod startup failures, and unsuccessful rollouts**, using kubectl logs, describe, events, and rollout diagnostics.
- Perform **Kubernetes deployment rollbacks and Helm release upgrades**, managing application recovery, Helm charts, environment-specific values, and release configurations.
- Support infrastructure provisioning and configuration management using **Terraform, Ansible, and Shell scripting**, automating Linux server administration, application configurations, and deployment workflows.
- Improved CI/CD and operational workflows through Jenkins and scripting automation, **reducing manual effort by 70% and improving release efficiency by 80%**.

Projects

1. **AWS EKS CI/CD Pipeline with Jenkins & Kubernetes (Multi-AZ)** [GitHub Repo ↗]

- Designed a highly available multi-AZ AWS EKS architecture using Terraform and implemented an end-to-end Jenkins CI/CD pipeline with dynamic Kubernetes agents, Docker, ECR, image scanning, ALB ingress, and automated rolling deployments.
  Tech Stack: AWS EKS, Terraform, Jenkins, Docker, ECR, Kubernetes, ALB

2. **GitOps CI/CD Platform with Kubernetes Auto-Scaling & Observability** [GitHub Repo ↗]

- Built a GitOps-driven CI/CD platform using GitHub Actions and Argo CD for automated Kubernetes deployments, integrating HPA and Cluster Autoscaler for dynamic scaling and Prometheus/Grafana for monitoring and observability.
  Tech Stack: Kubernetes, Argo CD, GitHub Actions, HPA, Cluster Autoscaler, Prometheus, Grafana

Education

Bachelor of Electronics and Communication Engineering
University BDT College of Engineering | Aug 2019 - May 2023 | 8.02 CGPA
